

Extended Use Dates Provided by Pfizer

Extended use dates to assist with EpiPen intermittent supply interruptions

[June 5, 2019] To address continued shortages of EpiPen®, Pfizer and Mylan are coordinating with FDA to **extend the expiration dates by four months** of all lots of EpiPen® (epinephrine injection, USP) 0.3 mg Auto-Injectors and its authorized generic version currently on the market in the U.S. after a review of stability data.

This announcement is based on a careful review of product stability data provided by Meridian Medical Technologies, Inc., a subsidiary of Pfizer, that manufactures EpiPen® Auto-Injectors and the authorized generic versions.

The affected lots, which have current expiration dates between February 2019 and October 2020, are listed in table below with their new expiration dates and can be found on EpiPen.com/EpiPenSupply. **The extension of the expiration dates does not apply to EpiPen Jr® (epinephrine injection, USP) 0.15 mg Auto-Injectors and its authorized generic version. Patients must continue to adhere to the manufacturer's expiry date labeled on EpiPen Jr® 0.15 mg and Epinephrine Injection, USP Auto-Injectors 0.15 products.**

IMPACTED PRODUCT

- **Epinephrine Injection, USP Auto-Injectors 0.3 mg**
NDC 49502-102-02 appears on the box
NDC 49502-102-01 appears on the individual device within the box
